Hi Alan,

Yes, Glenn forwarded that change to me, and it has been made in the overview diagram - but I didn't get a chance to make it in the detailed diagrams that got sent out today. It will be made in the next round of revisions.

Kate

Subject: Bristol Bay conceptual diagrams

Hi all,

Attached are the latest drafts of the Bristol Bay Assessment conceptual diagrams, based on discussions in Anchorage a few weeks ago. There are

4 detailed diagrams: (1) construction & operation / habitat effects; (2) construction & operation / water quality effects; (3) post-closure / habitat & water quality effects (we originally planned 2 post-closure diagrams, but I combined them into 1); and (4) accidents & catastrophes.

I've also attached an introduction to conceptual diagrams in the BBA, which includes the overview diagram, and a notes file - the notes file lists outstanding diagram-related questions for the technical team (e.g., in terms of priority pathways, additional shapes, etc.). With the exception of the notes file, these files are being sent to next week's IGTT meeting participants.

Please have a look through the 4 detailed diagrams and the notes document, and send along any comments you may have. I don't plan on making any revisions until after the IGTT meeting, so if you could get me comments by August 12, that would be great.

Cheers, Kate
